Electrical

Part Number	Nominal Input Voltage	Output Voltage	Output Current	Ripple (Typ.)	Efficiency (Typ.)	Certificate
DR-15-12	100-240VAC	12V	1.2A	12mV	80%	CE, FCC, CB, UL, CUL
DR-15-24	100-240VAC	24V	0.65A	15mV	83%	CE, FCC, CB, UL, CUL

NOTE:

1. The ripple values are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with 0.1uF & 47uF parallel capacitor under ambient temperature 25°C at rated input voltage and rated load;
2. The efficiency values are measured under ambient temperature 25°C at rated input voltage and rated load.

INPUT

PARAMETER	CONDITIONS	MIN	TYP	MAX	UNITS
Input voltage		90		264	Vac
Input frequency		47		63	Hz
Input current	Full load, Vin=115Vac Full load, Vin=230Vac		0.28 0.15		A A
Inrush current	Cold start, Vin=115Vac			30	A
	Cold start, Vin=230Vac			60	A
Inrush current	1. This product is built in inrush limiting circuit to protect the circuit from surge current damages when the power is turned on. Malfunction can occur by repeating the input voltage on and off rapidly. Therefore, sufficient interval should be given between turning on and off the power; 2. To avoid connecting the switch or fuse to input terminal(outside of the power supply), more consideration should be given when selecting the parts that can endure the inrush current				
Stand-by power consumption	Vin=230Vac		1.7		W
Surge voltage	L-N		2		KV

OUTPUT

PARAMETER	CONDITIONS	MIN	TYP	MAX	UNITS
Output voltage accuracy			±1		%
Output voltage adjustment range	DR-15-12		11.6-12.3		V
	DR-15-24		23.5-24.5		V
	Output voltage can be adjusted within above range by V-ADJ. variable resistance inside of the power supply. When output voltage exceeds the range, the power supply will be in failure or get into over voltage protection mode. To avoid the case that the output voltage is higher than rated voltage, output current should be used under rated current				
Minimum load		0			A
Line regulation	Vin from 100Vac to 240Vac		1		%
Load regulation	Vout from min. to max.		1		%
Turn-on delay time	Full load, Vin=115Vac		100		ms
Hold up time	Full load, Vin=115Vac		20		ms

Protection

Short circuit	Hiccup mode, it will recover automatically after fault condition is removed
Over voltage	DR-15-12: over voltage protection value 18V DR-15-24: over voltage protection value 30V
	(1) When output voltage exceeds above over voltage protection value or reversal voltage occurs, the protection will be started and the output voltage will be cut off in order to protect the power supply; (2) The power supply will recover after the power is turned on again
Over current	DR-15-12: over current protection value 1.8A DR-15-24: over current protection value 0.9A
	(1) When output voltage exceeds above over current protection value, the protection will be started and the output voltage will be cut off in order to protect the power supply; (2) The power supply will recover automatically after the fault condition is removed
Over temperature	Over temperature protection value: 100±10°C
	(1) When the ambient temperature exceeds above over temperature protection value, the protection will be started and the output voltage will be cut off in order to protect the power supply; (2) The power supply will recover after the power is turned on again

Environment
